

MONTAHA REBHI

Data Science, AI & Software Engineer

Erlangen, Germany | rebhi.montaha@esprit.tn | linkedin/montaha-rebhi | github.com/Montaha25
Portfolio: montaha25.io

PROFESSIONAL SUMMARY

Data Science, AI, and Software Engineer graduating in December 2026, currently completing my graduation internship at Siemens Energy, where I build AI agents, workflow automation, and Azure-based solutions. Hands-on experience across machine learning, deep learning, LLMs, RAG and agentic AI, plus production software development. Focused on turning manual business processes into reliable, scalable AI-driven products.

Availability: From January 2027 for full-time or part-time positions as Data Scientist, AI Engineer or Software Engineer.

PROFESSIONAL EXPERIENCE

Siemens Energy – Data Science & Software Engineer Intern (Graduation Internship) Jun 2026 – Dec 2026

Erlangen, Germany | Team: SE EQS Q-CoE

- Design and build AI agents with Microsoft Copilot Studio to digitalise internal company applications and support business teams.
- Automate end-to-end business workflows with Power Automate, migrating repetitive daily tasks to AI-driven solutions.
- Develop serverless back-end logic with Azure Functions and manage documents and data with Azure Blob Storage.
- Build low-code business applications on Microsoft Power Platform, integrated with automated flows and agents.
- Analyse existing processes with stakeholders, identify automation use cases and solve technical problems across the solution lifecycle.

Smartovate – Data Science Engineer Intern Jan 2026 – May 2026

London, United Kingdom (Remote) | Project: AI-Powered Job Search & CV Optimisation Platform

- Built an end-to-end platform covering CV upload, information extraction, ATS optimisation scoring and generation of redesigned, downloadable CVs.
- Developed a real-time web-scraping pipeline that collects job offers and matches them to the skills extracted from each CV.
- Trained a machine learning job-matching model with Explainable AI (XAI) features showing matched skills, missing skills and a direct link to apply.
- Implemented a conversational AI agent with LangGraph that answers user questions about the platform and the job offers.
- Generated personalised upskilling roadmaps with tips and project ideas to close the skill gaps found across the matched offers.
- Built analytics dashboards on the scraped market data (most in-demand skills, top hiring locations) and downloadable PDF reports; data stored in Azure Cosmos DB and PostgreSQL.

Esprit Tech – Data Science Intern Jun 2025 – Aug 2025

Tunis, Tunisia | Topic: LLMs for Real Estate Price Prediction

- Scraped, cleaned and consolidated 1,400 real-estate listings from Tunisian websites using Python and pandas.
- Built an automated data-processing pipeline for price prediction with engineered structured features.
- Applied LLM-based analysis of listing descriptions, improving model performance by 10% over the baseline (validated with cross-validation).

Wappy (Paris-based Startup) – Flutter Engineer & Team Lead Aug 2024 – Feb 2025

Remote

- Led development of scalable mobile components for a job recruitment platform using Flutter and Dart.
- Improved UI/UX for candidates and companies with advanced Flutter widgets and animations.
- Coordinated with cross-functional teams to deliver releases aligned with product goals and timelines.
- Met Apple App Store review requirements for UI/UX and functionality, leading to successful app publication.

Wappy (MidlJob) – Flutter Developer Intern Jun 2024 – Aug 2024

- Built key modules of the mobile app: user authentication, dynamic forms and RESTful API integration.
- Worked in agile sprints, writing clean, maintainable code under mentorship.

TELCOTEC – Graduation Intern (Bachelor) Feb 2023 – Jun 2023

Tunisia

- Built a real-time mobile facial recognition system with Flutter, Python and OpenCV, backed by Node.js and MongoDB.

EDUCATION

Philipps-Universität Marburg – M.Sc. Data Science, Exchange Program

Two semesters of Master-level coursework in Data Science | Marburg, Germany

Oct 2025 – Oct 2026

ESPRIT – Engineering Degree in Data Science & Software Engineering

Tunis, Tunisia

2023 – Dec 2026 (expected)

ISET'Com – Bachelor in Information & Communication Technologies

Specialisation: Networks and Telecommunications | Tunis, Tunisia

2020 – 2023

PROJECTS

Automated Candidate Screening Agent – ESPRIT

Sep 2024 – Mar 2025

- Built an LLM-powered assistant that helps job seekers improve their CVs, using Llama 3 (3B) locally and a fine-tuned Llama 3 (1B) for interview-question simulation.
- Developed a recruiter chatbot that scores CVs, and a RAG-based assistant (Ollama) that retrieves the most relevant CVs for a job description.

Lung Cancer Detection – Deep Learning Desktop Application

Feb 2025 – Jun 2025

- Built a pipeline of three models on CT scans: U-Net for nodule segmentation, DenseNet for cancer detection and EfficientNetB3 for cancer-type classification.
- Delivered a GUI with drag-and-drop scan upload, real-time predictions, automatic medical reports and doctor feedback, using TensorFlow and a Flask API.
- Produced a technical report and a scientific paper; selected to represent the class at the PI-DS ESPRIT competition.

Brain Tumor Classification

Feb 2025 – Mar 2025

- Trained CNN models to detect and classify brain tumor types from MRI images to support early diagnosis.

Customer Churn Prediction

Jan 2025 – Feb 2025

- Trained and compared Random Forest, Logistic Regression and XGBoost with scikit-learn; analysed results with Matplotlib and Seaborn.

TECHNICAL SKILLS

Programming: Python, SQL, R, Java, JavaScript, Dart, C/C++, PHP

AI & Data Science: Machine Learning, Deep Learning, NLP, LLMs, RAG, AI Agents, LangGraph, Explainable AI (XAI), Web Scraping, Generative AI, Computer Vision, Data Engineering, MLOps

ML Frameworks: TensorFlow, scikit-learn, Hugging Face Transformers, pandas, MLflow

LLMs & GenAI: Llama 3 (1B, 3B; local inference and fine-tuning), NVIDIA NIM APIs, Ollama, LangGraph, RAG

Web Scraping: SerpApi, Playwright, Selenium, BeautifulSoup

Microsoft & Cloud: Microsoft Copilot Studio, Power Automate, Power Apps (Power Platform), Azure Functions, Azure Blob Storage, AWS, GCP APIs

Development: FastAPI, Flask, Django, Node.js, Spring Boot, Symfony, Flutter, FlutterFlow, Streamlit

Databases: PostgreSQL, MySQL, Azure Cosmos DB, MongoDB

Tools: Git, Docker, Jupyter, Power BI

CERTIFICATIONS

- DataCamp: AI Engineer for Data Scientists Associate
- NVIDIA DLI: Building RAG Agents with LLMs; Building Transformer-Based NLP Applications; Building Real-Time Video AI Applications; Applications of AI for Anomaly Detection
- Hashgraph Developer Course – Certificate of Completion
- AWS Academy Cloud Foundations
- Cisco: CCNA 1, 2 and 3; Cybersecurity Essentials
- TOEIC (English); Certificat Voltaire (French)

LANGUAGES

Arabic (Native) | English (Fluent, C2) | French (Fluent, C2) | German (A2, B1 course ongoing) | Turkish (B2)
